Annexure – i

Bio – Medical (BMW) – Emergency Control Policy

BMW comprises of waste in colour coded bags that area used for segregation and proper disposal of sharps.

As per the hospital infection control policy, all waste is segregated as per BMW 2016 guidelines with display of posters at all places in the hospital.

When there is leak / breakage of bags, and the contents have come out, in the wards:

1. Cordon the area with signage board.
2. Report to housekeeping supervisor on duty on floor.
3. The housekeeping staff to wear heavy duty gloves.
4. To collect the spilled contents with hard sheet (exposed x ray plates)
5. Put absorbent material to cordon off the spill.
6. Put freshly prepared 1% sodium hypochlorite on the spill and wait for 15 minutes.
7. With double gloves, pick up the absorbent material and discard in yellow bag.
8. General cleaning as per hospital policy.
9. Discard the gloves in red bag.

To follow the same protocol for transport of biomedical waste and at the general storage area.

IF THERE IS SPILLAGE OF SHARPS FROM SHARP CONTAINER:

DO NOT HANDLE SHARPS WITH BARE HANDS.

1. Cordon the area with signage board.
2. Report to housekeeping supervisor on duty on floor.
3. The housekeeping staff to wear heavy duty gloves.
4. To use artery forceps / tooth forceps to pick up sharps from floor and discard into sharp containers that is leak proof and puncture proof.
5. Put absorbent material to cordon off the spill.
6. Put freshly prepared 1% sodium hypochlorite on the spill and wait for 15 minutes.
7. With double gloves, pick up the absorbent material and discard in yellow bag.
8. General cleaning as per hospital policy.
9. Discard the gloves in red bag.

To follow the same protocol for transport of biomedical waste and at the general storage area.
